BST11 ERP

Overview

Your AI-Ready ERP Platform

BST11 ERP is an AI-ready, project-based solution built for how architecture, engineering and environmental consulting firms operate.

Discover What Our Users Love About BST11 ERP

Modern Micro-Apps

Eliminate clunky workflows and complex screens. BST11 ERP's micro-focused Project, Billing and Timesheet apps streamline daily tasks by bringing your most used functions front and center in a sleek, consumer-grade experience.

Intelligent Data Agents

Imagine the possibilities. With BST11 ERP mirrored in the Microsoft Fabric ecosystem, Microsoft's AI-powered data agents can work with your ERP data to accelerate task completion, streamline workflows and unlock new efficiencies across your business.

Tailored Configurations

Work the way you want to. While BST11 ERP is already designed specifically to support AEC firms, it still allows you to adapt the experience to meet your firm's unique needs. Tailor your version to align with your established business processes, workflows, preferred screen displays and more.

Seamless Automation

Boost productivity with process automation. BST11 ERP's Azure-based iPaaS solution unifies your business systems into a single source of project truth. Our connectors for Microsoft Power Apps and Power Automate also let users develop, automate and connect low-code/no-code solutions with BST11 ERP documents and workflow events.

360° Project Visibility

Break down your data silos. BST11 ERP integrates project performance, financial, resourcing, billing and forecasting data to provide a unified view of your business and deliver actionable insights you can use to make informed decisions that boost the bottom line.

Microsoft Fabric Data Mirroring

Put your data to work. BST11 ERP mirrors data natively in Microsoft Fabric's lakehouse, providing near-real-time access to a validated and trusted source of information that's ready for analytics, advanced reporting, data agents and more.

Future Ready

Stay ahead of the curve. Prepare your firm for next-gen capabilities like agentic workflows, smarter automation and deeper analytics with BST11 ERP, the only AI-ready platform proven to support innovation and growth.

> **BST11's enhanced user interface and mobile capabilities are improving the overall project management experience tremendously. Plus, we hear all the time that our employees are in the field and unable to do this or that, but now they can get their work done wherever they are, which is huge!**
