

BST Insights Overview

Predict Project Outcomes With BST Insights

Like Waze GPS, but for projects, BST Insights tracks 35+ digital signals and applies AI and machine learning to predict project outcomes with more than 95% accuracy.

Discover What Our Users Love About BST Insights

- ✓ **Ready, Set, Go**
Inspired by today's leading consumer technologies, BST Insights offers a clean, consumer-grade design that's available from anywhere, at any time and on any device.
- ✓ **No More Noise**
Focusing on net labor multiplier (NLM) as a leading indicator, BST Insights cuts through the data noise so you know exactly what's impacting project health. Plus, you have the flexibility to adjust target NLM from one project to the next.
- ✓ **Start Your Data Engines**
BST Insights' AI and machine learning capabilities provide anomaly detection, indicate key impact factors, and offer recommendations for how to optimize and get your projects back on track.
- ✓ **A Perfect Match**
Designed to be complementary to your current systems, BST Insights requires no additional data collection or processing – it will use your current ERP data to predict project outcomes.
- ✓ **Laser Focused**
BST Insights keeps the project's most urgent needs front and center. It also gives project and operations managers a clear view of their entire portfolio, so they can easily identify which projects need their attention most.

“Project managers often come to me when they want help drilling down into the data to understand why a project might not be doing well. BST Insights will give them that information in an easy-to-understand display.

– Karen Delgado, Knowledge Manager, Colliers Engineering & Design

About BST Global

BST Global designs, develops and deploys the AEC industry's first suite of AI-powered project intelligence™ solutions specifically for the world's leading architects, engineers and consultancies.
