

Resource Management

powered by Audere Overview

Empower Your Project Teams With Audere

Part of the BST Global family, Audere is integrated with BSTII and lets you assign, balance and share work in an intuitive, collaborative experience.

Discover What Our Users Love About Our Resource Management Solution

- ✓ **Easy on the Eyes**
Inspired by today's leading consumer technologies, Audere offers an intuitive, consumer-grade design that's available from anywhere, at any time and on any device.
- ✓ **Heads-Up Happiness**
Audere is the collaborative tool teams need, showing live people, project and assignment updates across the board, so everybody knows what's happening.
- ✓ **The Perfect View**
Our resource management solution is dynamic, allowing users to pivot between people- and project-focused data views and easily identify the right people for the right projects every time.
- ✓ **A Personal Touch**
Within BSTII, users can personalize the Audere experience with contrast, data density and animation controls. They can also adjust assignments across days, weeks and months.

“As a team manager and a former consulting professional, I know how limited workload visibility and lack of collaboration can hinder a team. Audere gets resourcing out of spreadsheets and into an intuitive and collaborative experience — it's a complete game changer for teams.

— John Mathew, Product Director, Audere

About BST Global

BST Global designs, develops and deploys the AEC industry's first suite of AI-powered project intelligence™ solutions specifically for the world's leading architects, engineers and consultancies.
