# Resource Management
powered by Audere Overview

Empower Your Project Teams With Audere

Part of the BST Global family, Audere is integrated with BST11 and lets you assign, balance and share work in an intuitive, collaborative experience.

Discover What Our Users Love About Our Resource Management Solutioan

✓ **Easy on the Eyes**
Inspired by today's leading consumer technologies, Audere offers an intuitive, consumer-grade design that's available from anywhere, at any time and on any device.

✓ **Heads-Up Happiness**
Audere is the collaborative tool teams need, showing live people, project and assignment updates across the board, so everybody knows what's happening.

✓ **The Perfect View**
Our resource management solution is dynamic and smart, allowing users to pivot between people- and project-focused data views, and use Smart Suggestions to easily identify the right people for the right projects every time.

✓ **A Personal Touch**
Within BST11, users can personalize the Audere experience with contrast, data density and animation controls. They can also adjust assignments across days, weeks and months.

> " As a team manager and a former consulting professional, I know how limited workload visibility and lack of collaboration can hinder a team. Audere gets resourcing out of spreadsheets and into an intuitive and collaborative experience — it's a complete game changer for teams.
