# BST11 Work Management

Overview

## Smarter Project Operations Connected to Your ERP

Complement your AEC firm's current financial-based ERP investment with the power of BST11 Work Management, our project- and operations-focused solution.

## Discover What Our Users Love About BST11 Work Management

### Focused Micro-Apps

**Cut through complexity.** Designed for how work actually gets done, BST11 Work Management's streamlined Project and Timesheet apps remove unnecessary clutter and put essential actions front and center in a polished, easy-to-use experience.

### Agentic Intelligence

**Unlock what's possible.** With BST11 Work Management mirrored in the Microsoft Fabric ecosystem, AI-powered data agents can work with your project data to remove friction between business users and analytics and speed up your decision-making.

### Flexible Configurations

**Configure work to fit your firm.** BST11 Work Management supports industry-specific requirements while allowing you to configure workflows, displays and experiences to match how your firm already operates.

### Connected Automation

**Reduce manual effort.** BST11 Work Management's Azure-based iPaaS solution connects your project operations with your firm's other core business systems to streamline processes, improve data consistency and enable low-code automation with Microsoft Power Apps and Power Automate.

### Operational Visibility

**See the full picture.** BST11 Work Management connects with your existing financial-based ERP to bring project performance, financials, resourcing, billing and forecasting data together in a single, unified view so your teams can act on insights that improve outcomes and profitability.

### Validated Data Mirroring

**Turn data into impact.** BST11 Work Management mirrors data natively in Microsoft Fabric's lakehouse, giving you near-real-time access to a validated, trusted source that's ready for analytics, advanced reporting, data agents and more.

### Future Ready

**Prepare without compromise.** BST11 Work Management enables firms to adopt new capabilities — from agentic workflows to advanced analytics — on a platform built to scale, adapt and innovate.

> **We wanted to find a solution that would empower our project, finance and leadership teams, providing visibility into real-time data to gain efficiencies across our entire organization of more than 5,000 employees while complementing our current ERP platforms. We were also seeking a strategic partner that understood not just technology but our business and was committed to our industry with a strong vision, which is why we selected BST Global."**
